# 1Remote

1Remote is a remote access manager and connection launcher for Windows OS. It comes integrated with a number of different protocols but also provides extensibility options via existing CLI tools implementing any kind of protocol.

## Features

- OTB support for RDP, SSH, VNC, Telnet, (S)FTP, RemoteApp, NoMachine

- Quick and convenient remote session launcher

- Multi-screen and HiDPI RDP connection

- Detailed connection configuration: tags, icons, colors, connection scripts etc.

- Multiple languages, themes and tabbed interface

- Connection import from mRemoteNG

- Password encryption via RSA

- Customizable protocols

- Portable mode
